FOREWORD

A good cook book is like an extra pair of hands to help with your cooking, a personal shopper to direct your buying and a friendly dietitian to guide your meal planning. Through its wise use the members of your family not only enjoy the meals you prepare, but reflect the health and good spirits that come from well balanced meals properly cooked. The art of planning meals, tastefully prepared and served is the joy and the pride of every homemaker. The newer knowledge of nutrition has opened a new world to her and today her meals are both nourishing, palatable and attractive. This cook book offers a host of good recipes based on the BASIC SIX FOOD GROUPS and is the answer to many perplexing problems that confront her in the selection and preparation of adequate meals for her family. Planning the whole day's menus around the Basic Six is a new idea brought to near perfection only in the last few years. A knowledge of the BASIC SIX FOOD GROUPS makes for simple yet adequate and economical meals.

It has been a very frequent practice in the past to base food selection on whims and fancies of the different members of the family rather than on food value and the individual food needs of each member. Today, people are more nutrition-minded and take cognizance of their need for different groups of food for that optimal state of nutrition that they know will give them "optimum resistance to disease, optimum conservation of the factors of safety and powers of repair, and optimum length of life with optimum efficiency."

Skill and interest in cookery were virtues which the Filipino woman acquired in the good old days from a home-loving mother. Cookery skill was a matter of practice. Today, with more and more standardized recipes, things are different. A good recipe can spell the difference between a dish that is an epicure's delight from that which is the despair of everyone.

The recipes in this cook book are kitchen tested in the Recipe and Menu-testing Laboratory of the Institute of Nutrition. Many are original combinations based on old recipes but modified by using foods rich in vitamins and minerals. Other recipes are from collections compiled from local and foreign sources, but each recipe included in the booklet is chosen for its adaptability to the Filipino food habits and with special emphasis on locally produced and home grown foods.

Make all twelve rolls. Arrange in a small pan, place in a steamer and steam for half an hour.

Place these slices side by side as a lining for a saucer or small cereal dish. Pack the center tightly with the vegetable trimmings to fill the dish. Return to steamer and steam 10 minutes.
